

OPEN STUDIOS ART TOUR

Photographing Artwork Helpful Videos

The image you submit for the Open Studios Art Tour catalog is the most important and visible tool you have for the Tour. Visitors decide which studios to visit based on the image.

ARTS Obispo highly recommends having your art photographed by a professional photographer. You worked hard on the piece, and you need to show it in the best possible way!

If you have dabbled in photography and prefer to take your own images, here are some videos we have found that may help. (We are always looking for new resources and would welcome any suggestions you have.)
